

MOSFET Characteristics Apparatus with Regulated Power Supplies

Product Code:GE225

Objective:

- To plot the V-I characteristics of a MOSFET for different values of VGS

Specifications:

- Instrument Comprises of Two DC Regulated Power Supplies 0-5 VDC/150 mA & 0-25VDC/150 mA,
- Three Round Meters for Voltage & Current Measurement,
- One MOSFET IRF 840 mounted behind the panel connections of Supplies,
- Meters & MOSFET brought out at 4mm Sockets.
