

Function Generator 0.3Hz to 3MHz

Product code: GES16

- * Frequency Range :0.3Hz-3MHz. in 7 decade steps (Variable inbetween)
- * Functions: Sine, Square, Triangle, Ramp, Pulse TTL pulse output.
- Features: AM,FM,PWM& IntSweep
- Frequency Stability: With Frequency control centered <0.5% per hr at constant Amb.
Temp
- Display Frequency: Digital (3 1/2 digit? segmentdisplay).
- + Accuracy Frequency: + 2% + 7digits
- Amplitude: 20 Vp-p into open circuit (variable).
- * Attenuator (60dB):Steps attenuators 20dB, 40dB and variable 20dB
