

## Basic Logic Gates using Discrete Component (5 in 1)

**Product Code: GE373**

**Objective :** To verify the truth table for DTL AND, OR, NOT, NAND, & NOR gates.

**Features:** instrument comprises of  $\pm 5V/150mA$  DC Regulated Power Supply for logic 1 & logic 0. Circuit diagram For OR, AND & NOT gates has been printed & components mounted on front panel to demonstrate the working of DTL gates. NAND & NOR gates can be assembled using different combinations of Gates.
