

## IV-E656 Electromagnet (7.5k Guass)

### Apparatus Supply:

#### Electromagnet:

- Made of soft iron, specially design for Magnetic experiments,
- Mounted on a wooden base for stable performance,
- Field :- 7.5kg at 10mm. air gap,
- Core Material: Ferromagnetic.
- Bore piece. Iron with 5mm
- Coil current: 8.5 Amp (max) U core: 150X130mm (LXH), 40X40 mm cross section.
- Energizing Coils: – Two coils each with total resistance of 13 Ohm (approx).
- Termination: 4mm Terminals (30A)
- Optional:
- DC Power Supply IV-E188: 0-30V, 6A
- Patch Cords 4mm 1Mtr. Length: 2No.
